

Detuned reactor **DR3 12,5/7/T**

Picture shows DR3 50/7/T

Advantages

- No overloading of the capacitors
- Stabilizing mains impedance
- Low inductance tolerance
- Very good corrosion protection and low noise due to vacuum impregnation
- Extended linearity
- Thermal design for continuous duty in the event of mains operation and harmonics
- Optional with thermal switch

Applications

Detuned reactor for choking idle reactive power compensation capacitors.
